

AURA WHOLE HOUSE VENTILATION

Required for Manufactured Housing

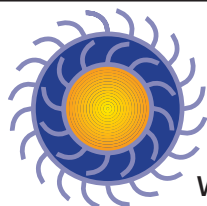

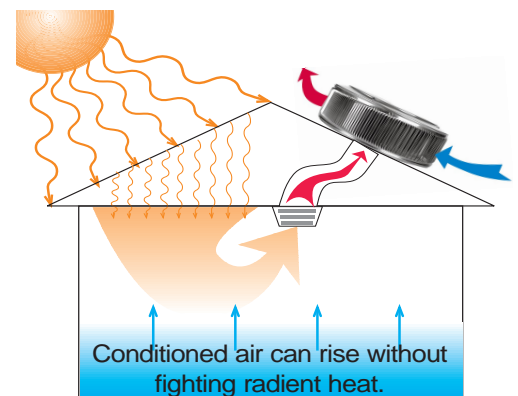

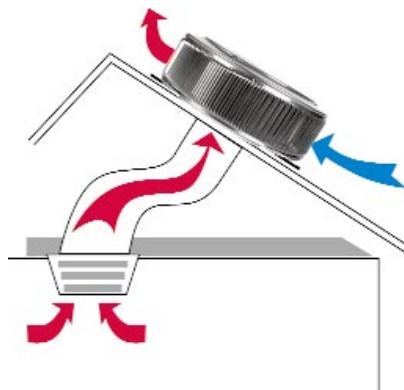

Designed to Save Energy

Save as much as
25%
of your Energy \$\$\$

- **A NEW CONCEPT CALLED: "ACTIVE VENTILATION"**
"Wind," a renewable energy source, moving against the *AURA VENTILATOR™*, produces the exhaust. Without electricity, the *Aura Whole House Ventilation System* efficiently and continuously provides the required air changes.
- **IMPROVE INDOOR AIR QUALITY**
Designed to create a healthy interior by expelling pollutants, it also reduces moisture and condensation-related problems.
- **SAVE ENERGY**
Without electricity, the *Aura Whole House Ventilation System* efficiently reduces the cost of air conditioning and heating by as much as 25%! (see other side).
- **LIFETIME GUARANTEE**

"AURA WHOLE HOUSE VENTILATION SYSTEM" continuously provides the required air change for the home, expels pollutants and controls moisture.
