

THE AURA™ BREATHER VENT

Removes moisture from under the roof membrane

ABV-6-D

One-way damper with mylar flap

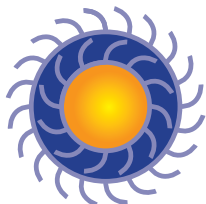

- Protects the roof more effectively than other leading breather vents because it removes water vapor before it condenses to liquid water
- Optional one-way damper prevents moisture from re-entering
- The Aura louver technology prevents rain or snow entry
- Easy to install
- Recommended 1 vent per 1,000 square feet
- All-aluminum construction

Removable Head for Easy Installation

At least 50% of our products are made from re-cycled aluminum.
